Investments to off-balance the crisis!

" The prospect of better times is better in bad times than in good ones"

We naturally believe this statement to be true - however, we also believe that only appropriate measures can lead to improving the current situation of the world economy in the long run.

Therefore, we extended our machinery by purchasing an additional CNC Ergomat automat to further optimise our in-house production. Thus we gained way more flexibility as well as further possibilities for new products "Made in Schloss Holte-Stukenbrock".

[The Data sheet for the CNC automat](#)

Your expectations and trust in us are rightfully high. We are prepared to meet and match both today and tomorrow! This is sure, as we are convinced that our continued and constant investment policy will enable us to increase our quality as well as our flexibility to match your expectations and requirements.

We are looking forward to our continuing and outstanding co-operation!
